

The Mastectomy Boutique Certification™

Program Guide

CE-Accredited · Oncology-Informed · 120-Hour Guaranteed Clinical Practicum

The gold-standard training for fitters, oncology professionals, and cancer center staff who want to serve breast cancer survivors with clinical excellence and profound compassion.

The Practicum Problem, Solved

Most certifications require a 120-hour supervised clinical practicum—but leave you to find it on your own. We don't just prepare you for your practicum. **We provide the structured, supervised 120 hours you need to get certified.**

Who This Program Is For

- Mastectomy fitters seeking a credible, clinically rigorous certification.
- Oncology nurses, navigators, and breast health educators expanding their scope.
- Boutique owners building a trusted post-mastectomy program.
- Cancer center staff bringing fitting services in-house.

Who This Program Is NOT For

- Anyone looking for a quick, check-the-box weekend certificate.
- Retailers who see this simply as a way to sell more bras.
- Individuals not ready to hold space for the complex emotional and physical needs of cancer survivors.

13-Module Curriculum

Every module pairs clinical depth with survivor-centered communication.

Module 1. Foundations of Post-Mastectomy Care

History, scope, and the survivor's journey from diagnosis through long-term care.

Module 2. Anatomy & Physiology of the Chest Wall

Musculature, lymphatics, fascia, and post-surgical anatomy.

Module 3. Surgical Procedures & Reconstruction

Lumpectomy, mastectomy variants, flap and implant reconstruction, expanders.

Module 4. Patient Assessment & Consultation

Intake workflows, contraindications, goal-setting, and clinical interviewing.

Module 5. Breast Forms: Types, Materials & Selection

Silicone, foam, partial, lightweight, swim, and attachable forms—matched to body and lifestyle.

Module 6. Mastectomy Bra Fitting Techniques

Measurement, balance, symmetry, and refining fit for unilateral and bilateral patients.

Module 7. Compression & Lymphedema Management

Sleeves, gauntlets, gradient compression, and coordination with CLT providers.

Module 8. Post-Surgical & Radiation Considerations

Skin integrity, scar care, radiation fibrosis, and timing of fittings.

Module 9. Cultural Sensitivity & Patient Communication

Trauma-informed language, body image, identity, and inclusive care.

Module 10. Insurance, Billing & Medicare Compliance

HCPCS codes, documentation requirements, ABNs, and audit-ready files.

Module 11. Scope of Practice & Ethics

Boundaries, referrals, informed consent, and professional conduct.

Module 12. Documentation & Recordkeeping

Clinical notes, HIPAA, retention policies, and digital recordkeeping.

Module 13. Clinical Practicum Preparation

Onboarding to your guaranteed 120-hour supervised practicum.

What You Receive

- **CE-accredited coursework** aligned to nursing and allied health boards.
- **Live virtual clinics** with master fitters and case-based learning.
- **Guaranteed 120-hour clinical practicum**—structured, supervised, and scheduled for you.
- **Downloadable protocols**, intake forms, consult scripts, and documentation templates.
- **Insurance & Medicare toolkit** with billing codes and compliance checklists.
- **Lifetime access** to curriculum updates and alumni community.
- **The Mastectomy Boutique Certification™ credential** upon successful completion.

The Transformation

- Walk into every fitting with the clinical authority of a trained oncology professional.
- Build a boutique so trusted that oncology departments put your number on their official resource list.
- Confidently state your premium fees—and get them without hesitation—because you have the clinical training and results to back it up.
- Become the fitter every survivor prays she'll find.
